One-time returning students:

No additional course fee
Must use the material issued the first time

ASI SAT-ACT Prep Program Essentials

For detailed program information, URL: asi-sat.com or email zmustafa@asi-sat.com

1. Overview:

- a. Key difference with other prep programs: ASI is not content based but based on improving test taking skills. Program shows how to improve scores based on what students already know.
- b. Question repetition/comprehension: It is a question repetition/comprehension approach: program shows how to recognize question repetition and know when to apply what has already been learned.
- c. ASI course is two for one: both ACT and SAT prep, covering full range of admissions requirements. It is made possible by the technique based structure.

2. Teaching Staff:

- a. Experienced teachers. ASI teachers are New York State certified and have more than 25 years of classroom teaching experience with added training for ASI method. The objective is to improve student skills as well as motivation – with positive impact on scores.
- b. Classroom teaching. ASI program has been successful because it moved away from traditional content approach to “what and how” of test taking skills. This is learned in a classroom environment with experienced and certified teachers.

3. Follow up of classroom teaching:

- a. The resource material includes “online guided practice” to the “what and how” of the first segment. It provides an interactive component to the ASI program. It makes the program dynamic, easy for students to understand and practice the lessons learned in the first segment. It is included in the resource material without any additional charge.
- b. We maintain that personal instruction is important. What this resource does is to connect the personal instruction with the online technology for follow up.
- c. Our teachers are able to monitor and direct student internet practice following the formal sessions. They are able to track progress, evaluate weaknesses and strengths and further motivate and direct student practice.

4. Session structure:

- a. It is a 22-hour program conducted over two consecutive weekends, 8:45-3 each day. The week between is available for one-on-one tutoring as needed – at no additional charge
- b. Students can retake the course one more time free of charge.
- c. All course material is included in the course fee.
- d. Course fee is USD 900.00 paid by credit card online: asipayment.com
